

801- Production Glossy Indoor Polypro

No need to sacrifice quality when needing to produce a low cost short-term banner. Our glossy production polypropylene produces high performing banners at the lowest cost. It has superior tear resistance and the microporous coating gives it the ability to reproduce photo quality images and make this the ideal media for indoor signage. Use with dye or pigment aqueous inks. Requires no lamination unless higher protection is needed.

- Water resistant with dye & pigment inks
- High color gamut with rapid drying times
- Extremely tear resistant
- Economical

Applications

- POP Displays
- Indoor Banners
- Photo and Graphic Displays

Physical Specifications

Base Weight: Grams/m2	160
Caliper (mil)	8
Storage	Indoor, 1 yr. between 50-80°
Life Expectancy	Indoor 6 mo./outdoor 3 mo.

This product has been tested with laminates. Pressure sensitive laminates provided the most aggressive bond and are recommended for use with this product. Lamination will help to extend the life of your print by reducing the rate of fade and protect against abrasion. Life extension varies due to climate and environmental conditions.
